

# Qualtrax

## SOLUTIONS & BENEFITS

*For The Food Industry*

### CHALLENGES

- Do not conform the process to meet the technology, rather use technology to make the process more efficient and productive
- Meet and exceed compliance and quality benchmarks consistently, quickly and accurately
- Reduce costs and inefficiencies related to QA/QC process
- Implement scalable technology that can be adapted to meet various plants, groups and international corporate requirements
- Ensure real-time notification to key employees, groups and departments when deviant inspection/audit findings occur
- Reduce time and cost associated with manual paperwork and documentation overload by implementing an electronic system
- Improve testing and training records management, annual review and reporting
- Reduce time and cost associated with preparing for and complying with internal, third party and/or government audits by utilizing one, central system
- Easily review, approve, and follow-up on data collected, audit findings, and any subsequent corrective actions
- Conduct, grade and report on audits and inspections more efficiently and reliably

### CONSIDERATIONS

- Food safety, quality operations, and compliance expertise
- Diverse customer base in a variety of industries
- Phased implementation allowing for gradual rollout
- Simple implementation and training process
- English/Spanish compatible user interface
- Established software solution
- ROI justification
- Clear project objectives and on-time delivery
