

# Streamlining & Managing **ACCREDITATION**

*For Automotive Manufacturers  
Who Make Quality the #1 Priority*

Quality is very important in today's marketplace and is often what differentiates a good product from a great one. Manufacturers that strive to be industry leaders know that a focus on quality and compliance to industry, customer, and internal standards is essential.

Implementing a comprehensive compliance software package will provide manufacturers with the tools it needs to improve management of system processes and documents to meet ISO/TS 16949, ISO 9001 and other ISO standards.

## **Why Qualtrax?**

Combining a robust document control engine with automated workflows, standards-based auditing, and employee testing capabilities, Qualtrax is an all-in-one compliance solution for ISO and other quality standards, accreditation requirements, and managing both internal and external audits.

## **FEATURES AND BENEFITS**

### **Document Control**

- All documents are stored in a single location.
- The most current revision always available.
- Documents can be set for review after a certain amount of time.
- Electronic signatures are used to authorize approvals and create audit trails.

*Document control solves the control issues associated with paper-based documentation and improves accessibility to important information.*

### **Workflows**

- Paper-based business processes requiring approvals are automated through the use of email alerts.
- Items needing attention collect in one place and escalate based on assigned due dates.

*The workflow engine streamlines business processes and eliminates unnecessary paper.*

### **Standards-Based Auditing**

- Each document is associated with specific sections of given standards and can be searched accordingly. There are unlimited standards.
- Administrators can perform gap analyses to identify missing documentation.

*This tool significantly reduces the time needed for internal and external audits*

### **Employee Training**

- Trainings can be associated with any document to ensure acknowledgement and comprehension of laboratory policies and procedures.

*The training function allows supervisors to train employees for specific processes and procedures and maintain records of the results to ensure competency.*
