

Qualtrax provides web-based Quality and Compliance Management Software that makes your life easier. Access and manage your documents and processes from anywhere.

Because your internal processes and needs vary, you can choose to host your Qualtrax system onsite or we can host it for you, alleviating the burden to your IT staff.

To help you make the best choice about your hosting options, here are the **key benefits** of the **Qualtrax Cloud**:

- Minimal IT involvement
- Secure, world-class hosting
- Turnkey setup
- System monitoring
- On-demand access

Benefits of the Qualtrax Cloud

Minimal IT Involvement

Qualtrax provides turnkey services to set up, install, and maintain your server and software. We take care of everything, providing you super-admin expertise. You'll always be on the most current Qualtrax release with the newest features, and you will not need IT assistance to upgrade. We handle all the hardware ownership for you.

Secure, World-Class Hosting

Our cloud hosting partner, Rackspace, offers a world-class infrastructure with industry-leading SLAs, including a 100% network uptime guarantee and system monitoring. Rackspace is ISO 27001:2005 Certified and holds all the security certifications necessary to ensure your data is safe.

Turnkey Setup

The Qualtrax Cloud provides you the fastest route for getting your server set up. It only takes a few days for our team to build, install, and configure your server for you, shortening time to implementation. And, benefit from a lower cost of entry through our subscription fee set up.

System Monitoring

In the cloud, we monitor system response times and general page usage to better enhance the product with each release. Data backups are also created every 15 minutes to ensure up-to-date recovery if needed. Constant system monitoring also allows us to begin working any potential issues before your users may even be able to report them to you.

On-Demand Access

All users have global access without logging in to your VPN, so you can access Qualtrax from anywhere. All traffic occurs over an SSL connection, ensuring the highest level of security to your data over the web.

The Qualtrax Cloud gives you all the options you've been looking for in a Quality Management Solution: minimal IT involvement; secure, world-class hosting; turnkey setup; system monitoring; and on-demand access. We would love to talk with you about how the Qualtrax Cloud can meet and exceed your expectations.
